OVERVIEW

The Property Vault is a registered Real Estate organization in the islands of Trinidad and Tobago, certified in *Building Construction* by the University of the West Indies (UWI) and one of only four Real Estate Firms regulated by the Royal Institution of Chartered Surveyors (RICS) in the Republic.

Built on the youthfulness of today's dynamic and technologically-driven economies, our company thrives on the pillars of managing client-needs and delivering service beyond what is expected.

As such, The Property Vault has earned accolades in national property publications and has formed principal relationships with both local and international property investors along with the largest property developers in the islands.

Our specialist range of premium services, in conjunction with a wealth of industry contacts, inclusive of Trinidad & Tobago's most prolific Real Estate Attorneys, Bankers and Financial Advisors, enable us to offer all our clients and affiliates the security of working with a trusted and respected organization.

With a highly qualified and motivated team of Property Professionals, we look forward to introducing you to our *Real Estate Experience*.

"Property Appraisals from Expert Valuers"

Official Reports

The Property Vault's Chartered Valuation Surveyors' membership and verification by *The Royal Institution of Chartered Surveyors*, a member of the International Valuation Standards Committee, positions our valuation reports among those of the highest standard globally.

With Trinidad and Tobago's signing of the Accord de Paris on 22nd April of 2016 subsequent to the United Nations Framework Convention on Climate Change (UNFCCC) dealing with greenhouse gas (GHG) emissions mitigation, adaptation and finance starting in the year 2020, the scope of the Valuer's job to account for sustainable attributes has grown greatly in significance.

Buildings now account for 32% of total global final energy use, 19% of energy-related GHG emissions and 33% of black carbon emissions; making property "the largest single share in global resource use and pollution emissions, and significantly impact(ing) the living conditions within societies".~ The Intergovernmental Panel on Climate Change (IPCC)

As such, our reporting uniquely comments on both traditional value-affecting factors and sustainable features, rendering our organization the domestic forerunners with regards to sustainability. Thus, our forward-thinking approach to property appraisals, along with our RICS standard of professional practices, guarantees our end-users the satisfaction of reliable reporting.

Who needs valuation reports?

Our property appraisals are covered by Professional Indemnity Insurance as part of our Quality Control Protocols and include a range of property types, inclusive of single dwelling units, townhouses, duplexes, apartment buildings, condos and land parcels.
